

User's Manual

## ■ Features

- Dimming and switching LED driver and conventional electronic ballast
- LED indicator for each channel
- Linear or logarithmic dimming curve programmable via ETS software
- Manual control via Push button on panel
- Programmable various time and scene function
- 3 years warranty

## ■ Applications

- Building Automation
- Lighting switch / dimming control

## ■ Description

The KAA-4R4V dimming actuator is a 4 channels device with high quality independent latching relay to turn on or off ,which is suitable for MEANWELL all kinds of LED drivers. The product specification indicate the maximum number of recommended LED drivers per channel which is easy for building planning. Based on the KNX architecture, KNX system engineers can easily program through the ETS system as needed during planning or use, or manually through the physical buttons on the panel. KAA-4R4V is independently configured with a green LED on each channels to indicate the status of the switch. The compact design with 4 units(72mm) wide modular makes it suitable for installation in the distribution board on 35mm mounting rails in the EIB/KNX application. In addition to the basic switch function, a DC 0(1)-10V signal to perform the dimming on the connected driver at each channel. The dimming curve can be adjusted to linear or logarithmic mode, so that the end user has excellent dimming experience. It can also be used with motion sensors in the buildings to save energy. The dimmer are powered via the EIB/KNX and do not require any additional power supply. As result, KAA-4R4V is featuring both reliability and multi functionality to meet various needs in a modern building.

■ Mechanical Specification

Case No. KAA

Unit:mm

ADMISSIBLE DIN-RAIL: TS35/7.5 OR TS35/15

■ **Max. output load per channel**

Maximum load	KAA-4R4V-10
Resistive load	2300 W
LED driver	refer to table below
Incandescent lamps	2300 W
Halogen lamps 230V	2300 W
Halogen lamps, electronic transformer	1300 W
Fluorescent lamps, not compensated	2000W
Fluorescent lamps, parallel comp.	1200W
Max. number of electronic transformers	15

■ **Nr. of driver per control output channel**

The maximum number of driver is 500 pcs per channel in case current from each driver is sourcing 0.1mA.  
 The actual number of driver is subject to applications. i.e. total cable length in system.

■ **Nr. of driver per relay channel**

The priority of the particular communication objects as well as the flags can be adjusted. The flag control the function of the objects in the programming where C stands for communication, R for Read, W for write, T for transmit and U for update.

## ■ Configuration and Commissioning

The application program(database) can be downloaded via Online Catalogs from ETS or via <http://www.meanwell.com/productCatalog.aspx>

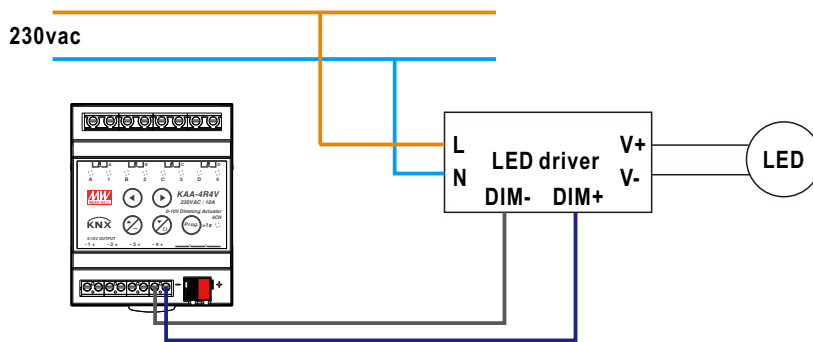

**Typical application**

● Application 1: Work with DC 1-10V LED driver

● Application 2: Work with DC 0-10V LED driver

● Application 3: Work with non-dimmable driver

**Recommended Screwdriver, Wire and Torque Setting**

1. Screwdriver (Width\*Thick): Slotted screwdriver 2.5\*0.4~3.5\*0.6
2. Wire: 0.5~4.0mm<sup>2</sup> solid core or 0.5~2.5mm<sup>2</sup> finely stranded
3. Torque: 0.8Nm
